What's happening in Kindy?

We have been having heaps of fun playing with all of the natural materials in our room and we will continue to explore these this week. We will continue to practise our measuring skills using uniform units such as unifix blocks to measure and compare the sizes of our natural materials.

We have been busy wondering at how God created the world and will be talking this week about how we can take care of the environment He created for us.

We are continuing to improve our balancing and jumping skills. This week we will begin to work on our hopping.

It is hard to believe we have almost finished a whole term of Kindy! It is wonderful to see the amazing learning that has taken place and the way the students have been so enthusiastic and engaged. Have a wonderful and safe holiday and we will see you on Tuesday 26th April ready to start Term 2!

Thank you for bringing in some examples of nature from your backyards and homes, the students have loved sharing these with each other!

If you have any empty small boxes eg, toothpaste, sultanas etc we would love to use these for our collage.

Mother's Day Morning—Thursday 5th May, 9:15-10:15am. More details to come!
