Our learning this week will focus on our bodies. We will begin by looking at the parts of our bodies and appreciating and thanking God for making us all so different. We will be talking about healthy foods we can eat and how we can protect ourselves from germs.

**Literacy**

The long ‘www’, ‘vvv’ and ‘nnn’ sounds will be introduced this week. We are having lots of fun making the long sounds with our mouths and concentrating on saying these sounds correctly. This week we will be creating some objects to share with the class during News time, I can’t wait to see the final masterpieces and hear about the cutting, gluing and painting involved in the process!

**Numeracy**

Recognising the numbers to ten will be a focus this week. We will spend time matching numbers and subitising (recognising a small number of objects without counting) a very important Numeracy skill.

**Motor Skills**

This week the circular pre-writing pattern will be introduced. We will be concentrating on starting at the top and going forwards and around, as well as backwards and around. Strengthening our internal core will also be a focus this week, as well as throwing and catching.

**Progress Files**

Thank you to everyone who has returned their Progress File already. If you have not done so, could you please return these as soon as possible so that we can begin to add to them for this term.

**School Photos**

*Thursday 26th May*

School photos will be taken this Thursday. Please make sure you have returned your photo envelope by this time.
