

## TERM 2 2018

### SCIENCE

## CURRICULUM OVERVIEWS

#### *Pre - Primary*

This term, Pre-Primary students will be concentrating on the Earth and Space Sciences strand of the curriculum. They will examine daily and seasonal changes in our environment considering how this affects everyday life.

#### *Year 1*

This term, Year 1 students are focusing on the Biological Sciences strand of the curriculum. They will consider how living things have a variety of external features who live in different places where their needs are met.

#### *Year 2*

This term, Year 2 students will concentrate on the Chemical Sciences strand of the curriculum. They will examine how different materials can be combined, mixed or changed for different purposes. E.g. Recycling.

#### *Year 3*

This term, students will concentrate on the Chemical Sciences strand of the curriculum. They will examine changes of state between solids, liquids and gases. They will consider how changes of state can be both beneficial and a hindrance.

#### *Year 4*

This term, students will concentrate on the Earth and Space Science strand of the curriculum. They will examine how the Earth changes over time as a result of natural processes and human activities.

#### *Year 5*

This term, students will work with the Earth and Space Science strand of the curriculum. They will study how the Earth is a part of a system of planets orbiting the Sun. They will gain a deeper understanding of our solar system, 'The Milky Way.'

#### *Year 6*

This term, students will explore the Biological Sciences strand of the curriculum. They will examine the growth and survival of living things and how they are affected by their environmental conditions.
